

SAMMAD FAROOQ

MERN STACK DEVELOPER

Contact

Name: Sammad Farooq
Phone: +923485105730
Email: sammadbinfoarooq@gmail.com
City: Islamabad, Pakistan
Linkedin: <https://www.linkedin.com/in/abdul-sammad-farooq/>
Github: <https://github.com/AbdulSammadFarooq>
Portfolio: <https://abdul-sammad-portfolio.vercel.app/>

EDUCATION

COMSATS University Islamabad
Bachelor of Science in Software Engineering (BSSE)

Feb 2018 — Feb 2022

Skills

Tools and Technologies:

- **Node.js:** Proficient in building scalable server-side applications and APIs.
- **Express.js:** Experienced in creating RESTful services and middleware for web applications.
- **Adonis.js:** Skilled in using this MVC framework for efficient backend development.
- **React.js:** Expertise in building dynamic and responsive user interfaces for web applications.
- **Web3.js:** Knowledgeable in blockchain integration and interacting with smart contracts.
- **Jest:** Unit and integration testing of functionality using JEST.
- **Ethers.js:** Developing dApps using Ethers.js for smart contract interactions, wallet integration, and transaction handling.
- **MongoDB:** Proficient in designing and managing NoSQL databases for high-performance applications.
- **MySQL:** Experienced in relational database design, optimization, and querying.
- **Firebase:** Skilled in real-time database management, authentication, and cloud functions.
- **Redis:** Experienced in using Redis for caching and session management to optimize performance.
- **Swagger:** Proficient in API documentation and design for developer collaboration.
- **JS Docs:** Skilled in documenting JavaScript code to maintain clarity and standards.
- **S3 Bucket:** Experienced in managing file storage and retrieval using Amazon S3.
- **Cloudinary:** Proficient in image and video management, including optimization and delivery.
- **Git:** Well-versed in version control and collaborative development workflows.
- **JavaScript Libraries:** Hands-on experience with various libraries to enhance functionality and user experience.

EXPERIENCE

MWAN MOBILE LTD

Full Stack Developer
Tech: (MERN Stack)

Rawalpindi, Pakistan
Jan 2025 - Present

- Developing and Analyzing Restful APIs
- Security and performance Measurements of system
- Airdrop Tokens and NFTs
- Developing SaaS platforms, Dashboards and marketplaces
- System Monitoring
- Token Swap using 1 inch service provider
- Integration of Network International (NI) and Stripe Payment Gateway
- Data Modeling
- Integration of third party APIs
- Microservices/Monolithic architecture
- gRPC and API gateway
- Centralize Web3 calls
- Unit and Integration Testing
- Redis and rate limiter

MWAN MOBILE LTD

React JS Developer

Tech: (JavaScript, ReactJS, CSS3, Redux toolkit, Tailwind CSS, Material UI)

- Front-end responsiveness and performance measurements
- Redux toolkit for state management
- React hooks
- Meta Mask Integration
- Integration of Payment Gateway
- Real time communication using Socket.io
- Marketplaces and CMS development
- QR Code, reCaptch, cropper functionality
- APIs integration
- CMS implementation

Rawalpindi, Pakistan

Apr 2023 - Jan 2025

MWAN MOBILE LTD

Backend Developer

Tech: (JavaScript, NodeJS, AdonisJS, TypeScript, MySQL, MongoDB)

- Integration of Payment Gateway
- Microservices and Monolithic architecture
- Data Modeling
- Third party libraries and APIs integration
- Integration of Webhooks
- Implementation of crone jobs
- BullMQ implementation for Job queues
- Centralize Web3 calls
- Deploy and Mint products on blockchain
- Usage of youtube and Vimeo APIs
- Utilize cloud for images and file handling
- Usage of Redis and API optimization
- Documentation of APIs using postman and swagger
- Source code documentation using JS Docs

Rawalpindi, Pakistan

Feb 2022 - Apr 2023

Freelancing

MERN Stack Developer

- Done tasks using React and Express JS
- Data scraping using cheerio and Puppeteer
- Functionalities of Course Management System
- Functionalities of E-commerce site
- other tasks using MERN stack

June 2021 – 2023

Certifications

React 18 Tutorial and Projects Course (2023)

<https://www.udemy.com/certificate/UC-e1f69cab-ffd5-457b-af9e-e097755fed1d/>

MERN Stack Certification by Pakistan Freelancing Training Program (PFTP)

https://drive.google.com/file/d/110i8icIG6z5NsrGX0uit8N1H5WeN7Wi2/view?usp=drive_link

MongoDB - The Complete Developer's Guide 2023

<https://www.udemy.com/certificate/UC-dda6efe4-26d2-416f-be2e-2e27f30930b9/>

Namaste Frontend System Design

<https://drive.google.com/file/d/1NFsNZQDkQ1y-6jxm2GbvEZNixErZEa6V/view/>

Learn JavaScript from Scratch

<https://drive.google.com/file/d/1F1e21CwcqbohAG9d-1nF200FXHt9eci/view>

Git from Basic to Advance: Practical Guide for developers

<https://www.udemy.com/certificate/UC-d5c5e9f4-2a1b-4f68-80bd-c7973acf5372/>

Certification of Appreciation

PROJECTS

EX-SPORTS Marketplace

Web Link: <https://marketplace.ex-sports.io/>

App Link: <https://play.google.com/store/apps/details?id=io.exs.android>

A blockchain-based NFT marketplace supporting Ethereum, BNB Chain, and Polygon. Enables users to buy/sell NFTs, view gaming events, and engage in digital collectibles.

Outlaw – dApp Wallet Ecosystem

In-House Development Project

A Web3-based decentralized wallet application enabling users to manage digital assets such as tokens, NFTs, balances, and transaction histories. Integrated functionalities include token swaps, wallet-to-wallet transfers, and off-chain modules like governance, airdrops, and gamified gold raffles.

- Developed Wallet Microservice using Node.js and MongoDB to handle core digital asset operations.
- Built a robust CMS in React.js for internal teams to manage user data and platform content.
- Implemented secure APIs for asset management, token swap, and NFT retrieval, consumed by mobile apps.
- Collaborated in microservice-based backend architecture, ensuring modular and scalable services.

Digital Asset SaaS Platform – Microservices Architecture

In-House Development Project

Developed a scalable SaaS platform that enables users to seamlessly manage and monitor their digital asset portfolios across multiple blockchain networks. The system supports wallet analytics, transaction history, token and NFT tracking, and plan-based access control.

- Designed and implemented key microservices using Node.js and gRPC to ensure modularity, scalability, and high availability.
- Engineered core backend functionality for secure digital asset retrieval, wallet syncing, and usage tracking.
- Built robust plan management features allowing tiered access and feature segmentation for enterprise and individual users.
- Integrated comprehensive authentication, rate-limiting, and service-level validation to support SaaS monetization.
- Contributed to system observability using logging, monitoring, and health-check protocols for each service.

AL-HEJIN Camel Game Marketplace

Web Link: <https://marketplace.ex-sports.io/>

App Link: <https://play.google.com/store/apps/details?id=io.exs.android>

Web3 gaming platform for trading virtual camels and participating in immersive gameplay to earn digital rewards.

Reward Marketplace (Development Mode)

Dev mode

A decentralized engagement platform where companies launch on-chain/off-chain task-based campaigns. Users earn rewards via luck draws or first-come-first-serve mechanics.

Scan and Trace

Dev mode

Blockchain-powered product authentication platform that allows brands to secure their supply chains and enables customers to verify product legitimacy via QR scanning.

Cold Email Marketer (FYP)

A SaaS-based lead generation tool for sending cold emails to targeted lists. Automates lead filtering through response analysis to identify high-intent prospects.

Course Management System (Aparavi)

Corporate e-learning platform offering customizable course memberships for employee training, tracking, and certification.

Other Projects and Functionalities

- E-commerce platform using MERN stack.
- Prismpay Digital Wallet – Backend maintenance and upgrades using Node.js.
- Reward Marketplace with campaign module integration using Node.js.
- Chat web application using MERN stack with real-time messaging.
- Multiple freelance projects involving data scraping, integrations, and UI development.
