

SAMMAD FAROOQ

MERN STACK DEVELOPER

Contact

Name: Sammad Farooq
Phone: +923485105730
Email: sammadbinafarooq@gmail.com
City: Islamabad, Pakistan
Linkedin: <https://www.linkedin.com/in/abdul-sammad-farooq/>
Github: <https://github.com/AbdulSammadFarooq>
Portfolio: <https://abdul-sammad-portfolio.vercel.app/>

EDUCATION

COMSATS University Islamabad
Bachelor of Science in Software Engineering (BSSE)

Feb 2018 — Feb 2022

Skills

Tools and Technologies:

- **Node.js:** Proficient in building scalable server-side applications and APIs.
- **Express.js:** Experienced in creating RESTful services and middleware for web applications.
- **Nest.js:** Experienced in creating scalable and modular architectures of a system.
- **Adonis.js:** Skilled in using this MVC framework for efficient backend development.
- **React.js:** Expertise in building dynamic and responsive user interfaces for web applications.
- **Web3.js:** Knowledgeable in blockchain integration and interacting with smart contracts.
- **Jest:** Unit and integration testing of functionality using JEST.
- **Ethers.js:** Developing dApps using Ethers.js for smart contract interactions, wallet integration, and transaction handling.
- **MongoDB:** Proficient in designing and managing NoSQL databases for high-performance applications.
- **MySQL:** Experienced in relational database design, optimization, and querying.
- **Firebase:** Skilled in real-time database management, authentication, and cloud functions.
- **Redis:** Experienced in using Redis for caching and session management to optimize performance.
- **Swagger:** Proficient in API documentation and design for developer collaboration.
- **JS Docs:** Skilled in documenting JavaScript code to maintain clarity and standards.
- **S3 Bucket:** Experienced in managing file storage and retrieval using Amazon S3.
- **Cloudinary:** Proficient in image and video management, including optimization and delivery.
- **Git:** Well-versed in version control and collaborative development workflows.
- **JavaScript Libraries:** Hands-on experience with various libraries to enhance functionality and user experience.

EXPERIENCE

MWAN MOBILE LTD
Full Stack Developer
Tech: (MERN Stack)

Rawalpindi, Pakistan
Jan 2025 - Present

- Implement real-time monitoring, logging, and performance tracking while enforcing strong security and access controls.
- Design scalable systems using modular microservices or efficient monolithic structures based on project scope.
- Architect robust, fault-tolerant infrastructures with efficient data flow, caching, and load balancing strategies.
- Develop and deploy automated airdrop systems for tokens and NFTs using blockchain smart contracts.
- Enable live updates, notifications, and chat functionalities through WebSocket-based communication
- Build multi-tenant, subscription-based applications with scalable infrastructure and integrated payment systems.
- Integrate AI-driven conversational and automation capabilities using OpenAI's ChatGPT API.
- Design optimized schemas, manage indexing, and ensure data consistency across multiple environments.
- Implement secure user access control using JWT, OAuth2, and role-based permissions.
- Microservices/Monolithic architecture
- Continuously profile, benchmark, and fine-tune system performance for speed and scalability.

MWAN MOBILE LTD

React JS Developer

Tech: (JavaScript, ReactJS, CSS3, Redux toolkit, Tailwind CSS, Material UI)

Rawalpindi, Pakistan

Apr 2023 - Jan 2025

- Ensured high performance and data security with caching, validation, and optimized API response handling.
- Enabled instant updates and live interactions through Socket.io for chat, alerts, and dashboards.
- Integrated MetaMask for secure wallet connection, user authentication, and on-chain transactions.
- Developed modules to deploy contracts and mint NFTs securely on Ethereum-based networks.
- Built modular, reusable React components for faster development and consistent UI experience.
- Implemented global state with Redux Toolkit for scalable and predictable data flow.
- Used Axios with interceptors for secure API calls, token handling, and unified error management.
- Crafted responsive, modern layouts with Tailwind CSS for optimal experience on all devices.
- Added Winston and API metrics for performance tracking and real-time system monitoring.
- Improved performance using lazy loading and code splitting for faster page loads.

MWAN MOBILE LTD

Backend Developer

Tech: (JavaScript, NodeJS, AdonisJS, TypeScript, MySQL, MongoDB)

Rawalpindi, Pakistan

Feb 2022 - Apr 2023

- Designed and optimized RESTful APIs ensuring reliability, scalability, and clean data exchange between client and server.
- Implemented caching, code optimization, and security best practices like JWT, rate limiting, and input sanitization.
- Structured efficient and scalable data models to handle complex relationships and large-scale data operations.
- Integrated push notifications and third-party APIs (Firebase, Google, Meta) for enhanced user engagement and automation.
- Integrated Stripe, Mercado Pago, and Web3 provider logic to enable secure fiat and blockchain-based transactions.
- Implemented real-time updates for live chats, notifications, and dashboard synchronization.
- Implemented efficient job queues for background task processing.
- Streamlined blockchain interactions for consistency and reliability.
- Integrated video platforms for seamless content management.
- Documented REST APIs using Postman and Swagger for clarity and maintainability.
- Utilize cloud for images and file handling
- Maintained code documentation with JSDoc for readability and team collaboration.

Freelancing

MERN Stack Developer

June 2021 – Present

- Delivered multiple full-stack features using React for frontend and Express.js for backend.
- Implemented efficient data extraction solutions using Cheerio and Puppeteer for automation.
- Developed key functionalities for managing courses, enrollments, and progress tracking.
- Built core e-commerce modules including product listings, cart, checkout, and order management.
- Contributed to various projects leveraging the full MERN stack for scalable application development.

Certifications

React 18 Tutorial and Projects Course (2023)

PROJECTS

EX-Sports : Decentralized Collectible Cards Rewards

Web Link: <https://marketplace.ex-sports.io/>

A blockchain-based NFT marketplace supporting Ethereum, BNB Chain, and Polygon. Enables users to buy/sell NFTs, view gaming events, and engage in digital collectibles.

Jobboard : Research and Innovation Foundation

Web Link: <https://internships.research.org.cy/>

Research and Innovation Foundation (Cyprus) – Government-backed platform supporting research, innovation projects, and internship opportunities connecting students with funded RnD programs and industry partners.

Chains Pilot

Web Link: <https://mwanchain-frontend.dev.mwancloud.com/login/>

Developed a Software-as-a-Service (SaaS) platform that empowers developers and businesses to seamlessly integrate Web3 capabilities into their applications through secure and scalable APIs. The platform allows users to create API keys, purchase subscription plans, and access blockchain-based endpoints to interact with digital assets, tokens, and on-chain data. Designed with a multi-tenant architecture and role-based access control, the system supports usage-based rate limiting, real-time analytics, and automated billing for subscription management. Built with the MERN stack, it ensures a high-performance backend, intuitive React-based UI, and secure API gateway for smooth developer onboarding and usage monitoring.

Outlaw Digital Wallet

Web Link: <https://www.outlawgames.app/>

Android Link: <https://play.google.com/store/apps/details?id=com.outlawgame.android>

IOS Link: <https://apps.apple.com/us/app/outlaw-games/id6753969904>

Responsible for developing and maintaining the wallet service module, integrating Moralis for digital asset retrieval and implementing wallet functionalities including transaction history, token holdings, NFT listings, and token swap operations via the 1inch API. Collaborated with cross-functional teams, while other user-related services were managed by separate modules.

Reward Marketplace

Web Link: <https://loyalty-marketplace.dev.mwancloud.com/campaigns/marketplace>

A decentralized engagement platform where companies launch on-chain/off-chain task-based campaigns. Users earn rewards via luck draws or first-come-first-serve mechanics.

Outlaw - CMS

Web Link: *Confidential*

Developed a comprehensive Content Management System (CMS) for Outlaw Digital Wallet, featuring a dynamic and data-driven interface that visualizes system-wide analytics through interactive graphs and real-time statistics. The platform empowers administrators with full control over user management, notifications, leaderboard configuration, game settings, token swap reporting, and community forum moderation. Designed and implemented the entire front-end architecture, ensuring a seamless, responsive, and visually engaging user experience that aligns with enterprise-grade performance and scalability standards.

EX Sports Marketplace and Games

Application Link: <https://play.google.com/store/apps/details?id=io.exs.android&hl=en>

Al-Hejin stands as a decentralized web3 gaming platform, inviting users to acquire virtual camels and engage in captivating gameplay. It offers to purchase camels and packs and win the exiting rewards

Scan and Trace

Web Link: <https://scantrace.dev.mwancloud.com/>

Blockchain-powered product authentication platform that allows brands to secure their supply chains and enables customers to verify product legitimacy via QR scanning.
